

**Sambhram Academy of Management Studies**  
**Post-Graduate Faculty and Students Virtual Webinar**  
**“Block Chain Technology: Concepts and Technologies”**  
**February 05, 2022**

The Report

- ✓ Resource Person: Prof T Siddaiah, Former Registrar, SV University
  
- ✓ Prof K C Mishra, Principal kick started the Webinar with a welcome note to Prof Siddaiah, Faculty Members and PG students of MBA, M Com and MCA. Then Prof Siddaiah gave presentation on Block Chain Technology and its future prospects emphasising on working, management, acceptability and future prospects of Crypto-Currency Bitcoin. The students got a chance to learn about the importance of Block Chain Technology, need to update them and to enhance their skills. The main aim of the webinar is to provide a platform for open discussion on the concept and applications of Block Chain Technology. Unlike traditional contracts that rely on middlemen and third-party intermediaries for execution, Block Chain based smart contracts automate contractual procedures, minimize interactions between parties and reduce administration cost. It has a nearly endless amount of applications across the organizations, sectors and businesses.

Dr Surabhi, Associate Professor of School of Management and Mr. Nanjundeshwara, Assistant Professor of School of Computer Science coordinated the Webinar.
